## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed 12/4/2007, with respect to the 112 1<sup>st</sup> rejection have been fully considered and are persuasive. The 112 1<sup>st</sup> rejection of claims 1-12,33-37 and 37 has been withdrawn.
2. Claims 13-32,38-42 are cancelled.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David T. Yang (Reg. No. 44,415) on 2/29/2008.

The claims are to be amended as follows:

Claim 4, line 6: after "one" delete "anther" and insert in its place - - another - -.

Claim 43, line 14: delete "a second storage that stores second scene data specifying contents of a mixing process".

### ***Allowable Subject Matter***

4. Claims 1-12,33-37 and 43-47 are allowed.
5. Regarding claims 1,33 and 43 prior art US 4,993,073 to Sparkes discloses a digital signal mixing apparatus. Prior art WO 99/37046 to Powers et al. discloses a sound-mixing console with master control section. Prior art EP 0 251 646 to Franks et

Art Unit: 2615

al. discloses an audio production console. Prior art JP 09-298517 to Matsutani et al. discloses an audio mixer. Prior art WO 99/37032 to Mackie et al. discloses a digital signal mixing architecture. Prior art JP 2000-261391 to Aoki discloses a bidirectional cascade-connecting mixer.

Regarding claims 1 and 33, the prior art fails to disclose or make obvious a first transmission step for transmitting a scene recall request from said first mixing system to said second mixing system when a recall event of said first scene data occurs in said first mixing system; a second transmission step for transmitting back a recall enabling response from said second mixing system to said first mixing system after said second mixing system receives said scene recall request; a first reconstruction step for reconstructing the contents of the mixing process by said first mixing system on the basis of said first scene data after the reception of said recall enabling response by said first mixing system; and a second reconstruction step for reconstructing the contents of the mixing process by said second mixing system on the basis of said second scene data after the transmission of Said recall enabling response by said second mixing system.

Regarding claim 43, the prior art or combination thereof fails to disclose or make obvious a first transmission part that transmits a scene recall request from said first mixing system to said second mixing system when a recall event of said first scene data occurs in said first mixing system; a first reception part that receives a recall enabling response from said second mixing system; a first reconstruction part that reconstructs the contents of the mixing process of said first mixing system on the basis of said first

scene data after the reception of said recall enabling response, and wherein said second mixing system comprises: a second storage that stores second scene data specifying contents of a mixing process; a second transmission part that transmits said recall enabling response to said first mixing system after said second mixing system receives said scene recall request; and a second reconstruction part that reconstructs the contents of the mixing process of said second mixing system on the basis of said second scene data after the transmission of said recall enabling response to said first mixing system.

Therefore the prior art or combination thereof fails to disclose or make obvious a method of controlling a total mixing system and a total mixing system as claimed.

Claims 2-12,34-37 and 44-47 are allowed due to dependency on claims 1,33 and 43.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
